

# Save Soil

a global exhibition  
of art, poetry & more

**SAVE  
SOIL**

**Join us!**

Healthy soil is a  
**solution**  
to climate change,  
floods, droughts,  
**hunger,**  
biodiversity loss  
and more!

Unfortunately, soil is  
degrading across the globe  
The UNCCD predicts that  
**90%**  
of the world's soil  
could be degraded  
by 2050, unless  
we act now.

We need policies for soil  
health in every country!  
Use your creativity to  
**raise your voice**  
for soil.

Receive a certificate  
for your participation.
